Modernizing Project Management

CLARUSWAY[©]
WAY TO REINVENT YOURSELF

Have you heard the Agile approach before?
What is your history about Agile?

Students choose an option

► Modernizing Project Management ►

A project is a planned program of work that requires a definitive amount of time, effort, and planning to complete.

Goals & Objectives

Fixed period of time

Certain budget

Agile approaches are a response to the need to modernize PM.

7

► The Origins of Modern PM ►

WWII
step-by-step
manufacturing
models

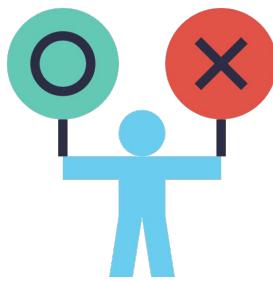

1940-1950's
manufacturing
process

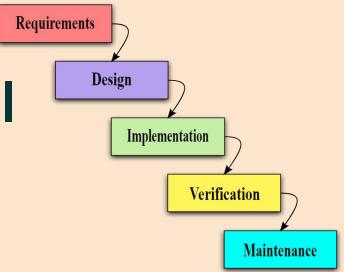

after 1970's
waterfall
model

On waterfall projects, you move to the next phase only when the prior one is complete — hence, the name waterfall.

8

We can say that the Waterfall model is a traditional one.

11

2 ► Agile Manifesto

The Agile Manifesto

A group of 17 people thought:

"We're all doing these different approaches to developing software. We ought to get together and see where there are commonalities in what we're thinking about."

The result was a meeting at a ski resort in Snowbird, Utah in 2001.

13

The Agile Manifesto

In this video, Ken Schwaber, co-creator of Scrum and original member of the group signing the Agile Manifesto in an interview with the Boston Business Journal discusses how it came about.

14

The Agile Manifesto

Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it.
Through this work we have come to value:

Individuals and interactions over processes and tools
Working software over comprehensive documentation
Customer collaboration over contract negotiation
Responding to change over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

Kent Beck	James Grenning	Robert C. Martin
Mike Beedle	Jim Highsmith	Steve Mellor

3

Agile Principles

Agile Principles

1 Our highest priority is to **satisfy the customer** through early and continuous delivery of valuable software.

3 **Deliver working software frequently**, from a couple of weeks to a couple of months, with a preference to the shorter timescale.

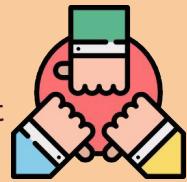

Welcome changing

2 requirements, even late in development. Agile processes harness change for the customer's competitive advantage.

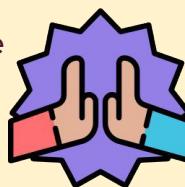

4 Business people and developers must **work together** daily throughout the project.

25

Agile Principles

5 Build projects around motivated individuals. Give them the environment and **support** they need, and **trust** them to get the job done.

6 The most efficient and effective method of conveying information to and within a development team is **face-to-face conversation**.

7 **Working software** is the primary measure of progress.

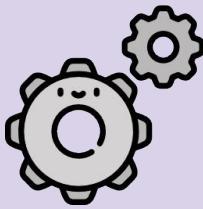

8 Agile processes promote **sustainable development**. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.

26

Agile Principles

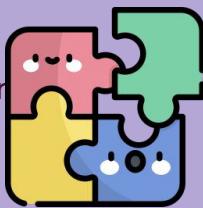

9 Continuous attention to technical excellence and good design enhances agility.

10 simplicity--the art of maximizing the amount of work not done--is essential.

11 The best architectures, requirements, and designs emerge from self-organizing teams.

12 At regular intervals, the team **reflects** on how to become more effective, then tunes and **adjusts** its behavior accordingly.

27

12 Agile Principles

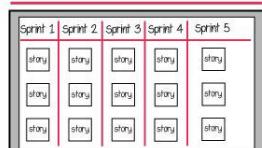

1 Satisfy the **customer**

2 Welcome **change**

3 Deliver **frequently**

4 Work **together**

5 Trust and **support**

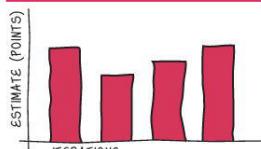

6 Face-to-face **conversation**

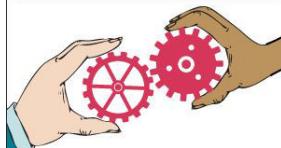

7 Working **software**

8 Sustainable **development**

9 Continuous **attention**

10 Maintain **simplicity**

11 Self-organizing **teams**

12 Reflect and **adjust**

28

Which one is NOT an Agile Principle?

- A. Satisfy the boss
- B. Welcome change
- C. Maintain simplicity
- D. Work together

4

Overview of Agile Approach

► Changes as a Result of Agile Values ➤

Agile approaches changed attitudes toward project management processes.

31

► Changes as a Result of Agile Values ➤

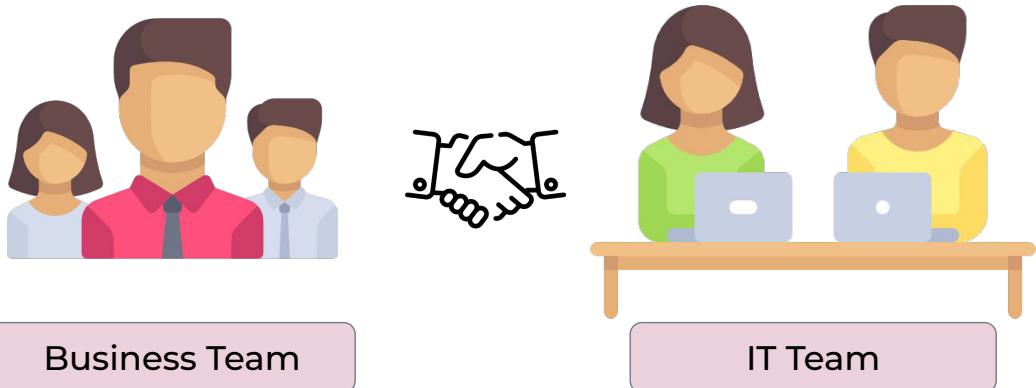

Agile approaches changed attitudes toward knowledge workers.

32

► Changes as a Result of Agile Values ➤

Agile approaches changed the relationship between business and IT groups.

33

► Changes as a Result of Agile Values ➤

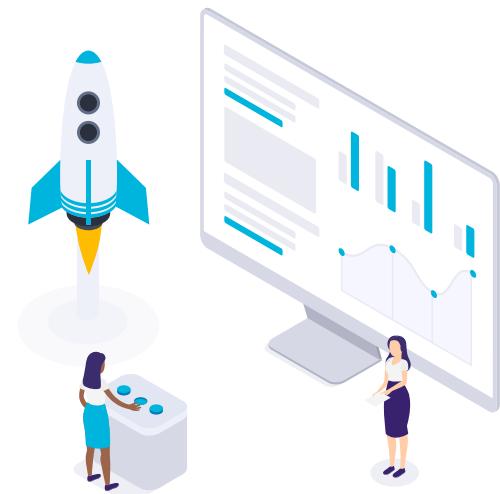

Agile approaches corrected attitudes toward change.

34

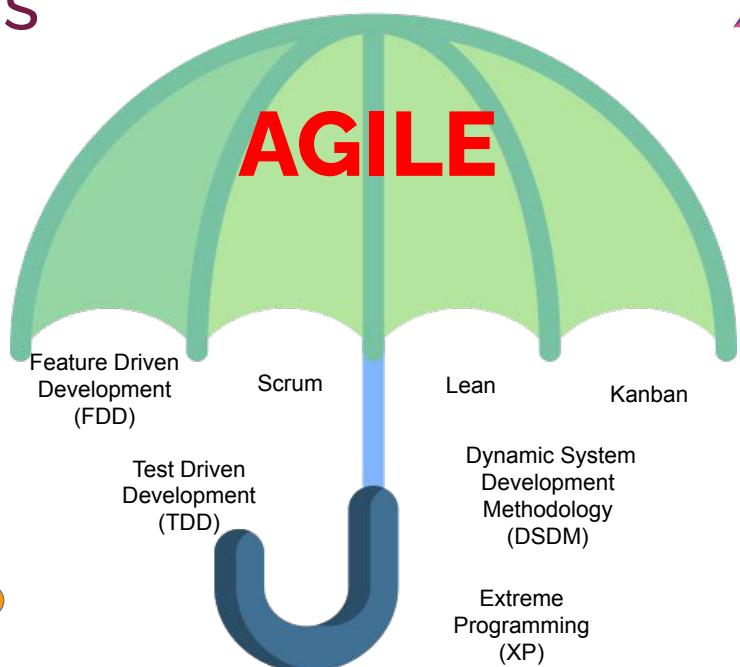

Agile Methods

CLARUSWAY[©]
WAY TO REINVENT YOURSELF

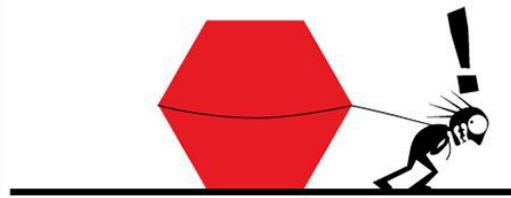

Agile Methods

Agile is an umbrella under which many specific methodologies have been developed and are thriving.

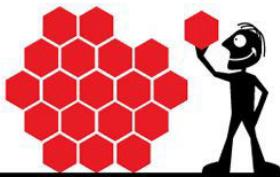

Let's Wrap it Up

THE WATERFALL PROCESS

*'This project has got so big,
I'm not sure I'll be able to deliver it!'*

THE AGILE PROCESS

*'It's so much better delivering this
project in bite-sized sections'*

The product can be easily and rapidly developed and tested by dividing it into small pieces.

Small pieces are produced in iteration cycles.

By using iterations, changes can be made without having to wait for the final product.

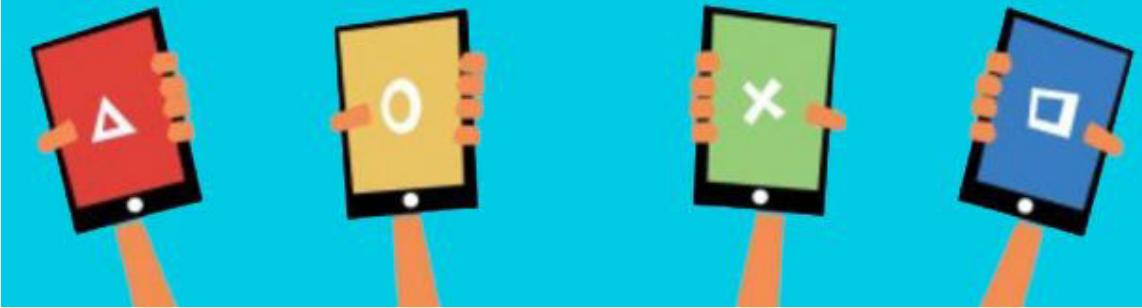

37

In one minute,
explain the most
important thing
about Agile.

Kahoot!

5

Scrum Overview

► What is Scrum?

A framework within which people can address complex adaptive problems, while productively and creatively delivering products of the highest possible value.

Lightweight

Simple to understand

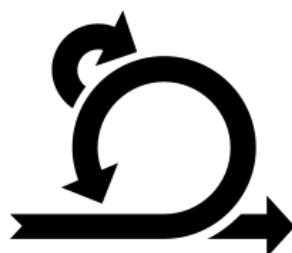

Difficult to master

41

► What is Scrum?

Scrum emphasizes delivering business value frequently through short iterations known as sprints.

This gives visibility to the work that's being done and creates opportunities for feedback.

42

► Origin of Scrum

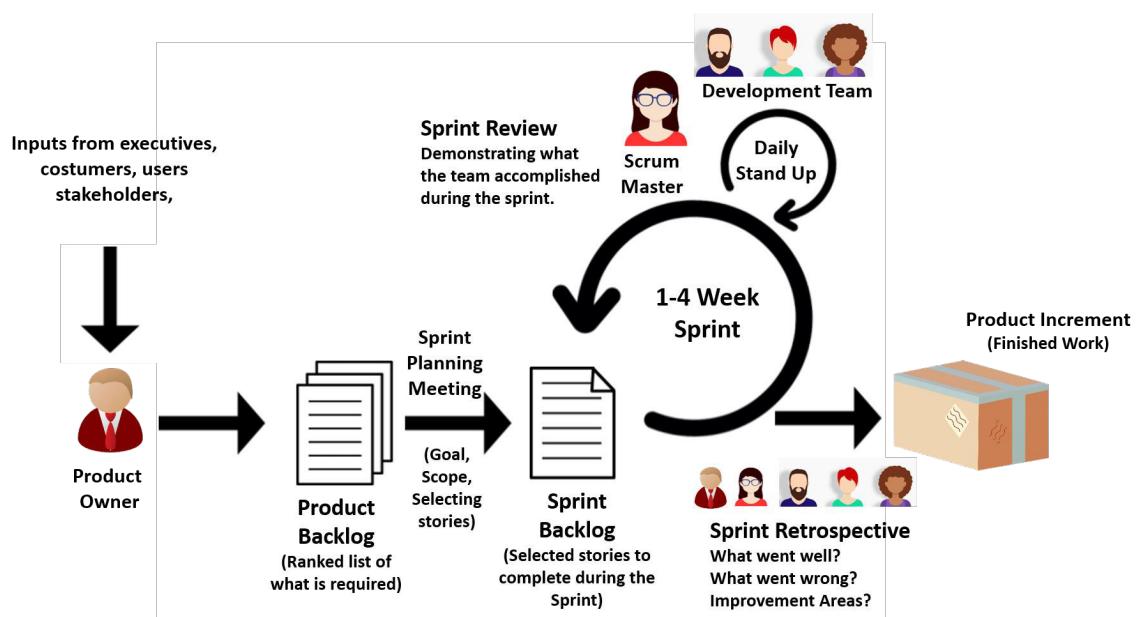

Scrum is one of the leading agile techniques developed in the 1990s by Ken Schwaber and Jeff Sutherland.

More than 50% of all projects use this methodology.

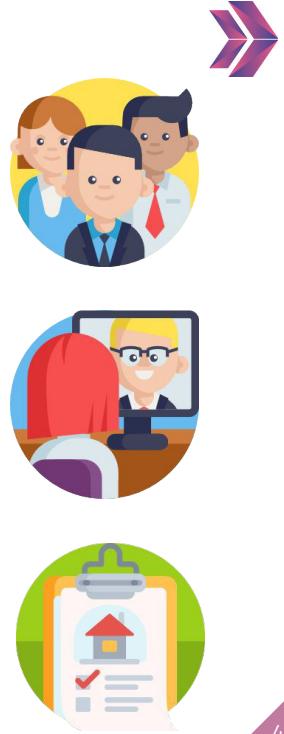

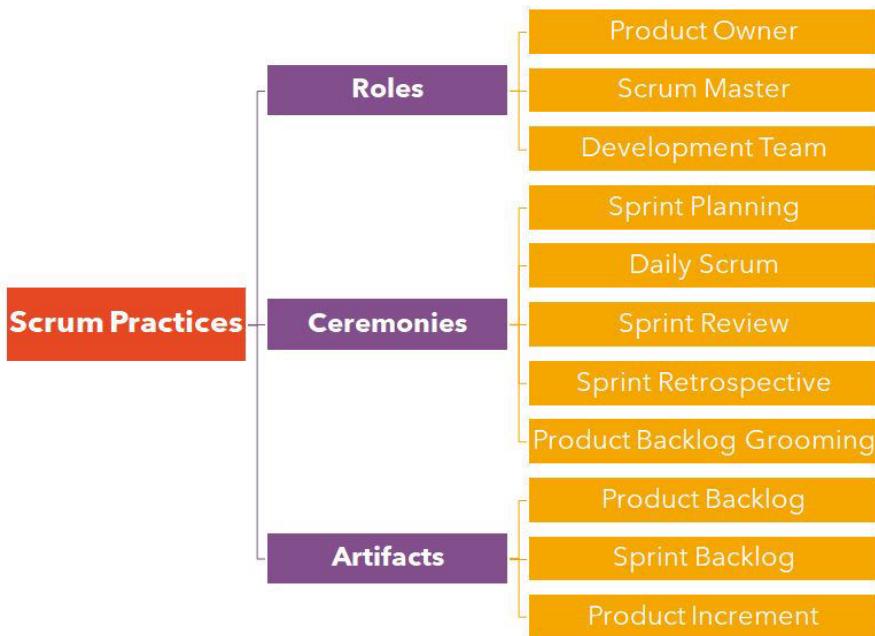

43

► Scrum Framework

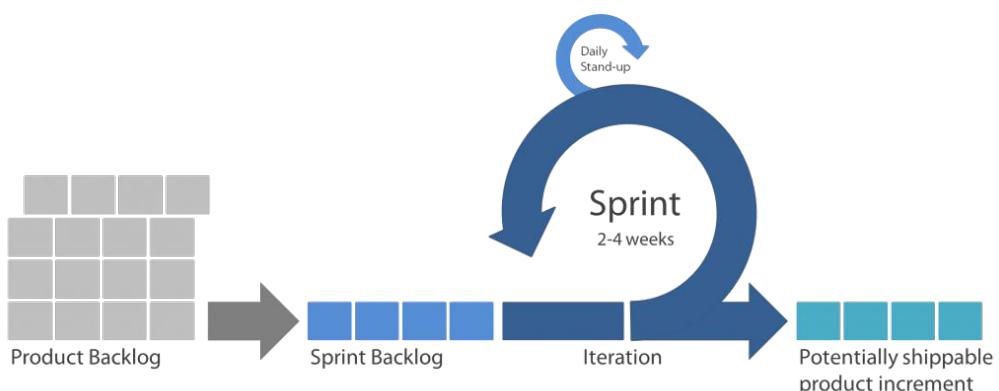

44

Scrum Practices

6 Scrum Roles

CLARUSWAY[©]
WAY TO REINVENT YOURSELF

Scrum Roles

Product Owner

Responsible for the project's success by defining the project vision, requirements, and priorities

Scrum Master

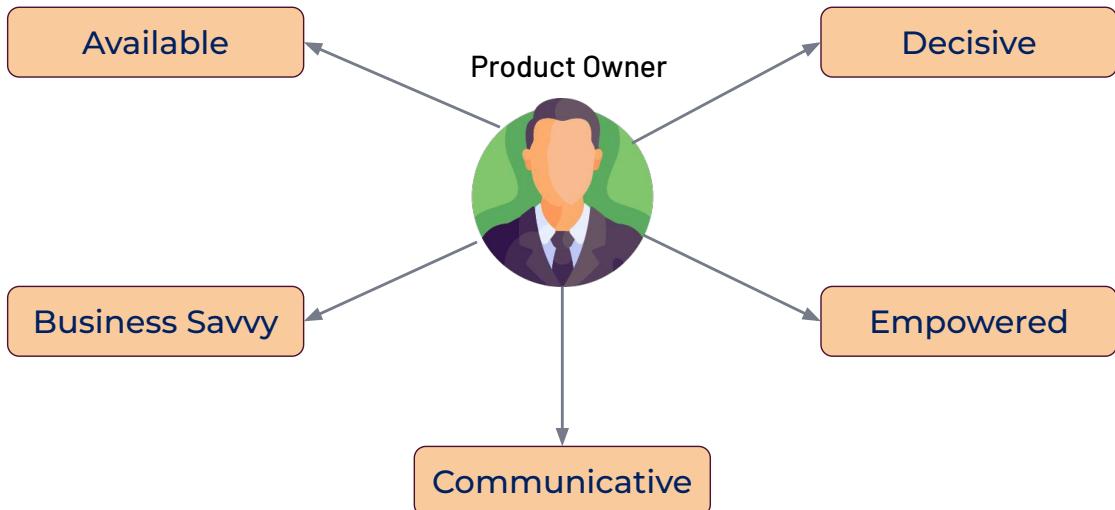

Accountable to the team to remove impediments that will prevent them from achieving the goals of the Product Owner

Development Team

Team comprises 3-9 people, with a mix of roles, and self-organizes to determine how to best meet the goals of the Product Owner

Product Owner

49

Product Owner

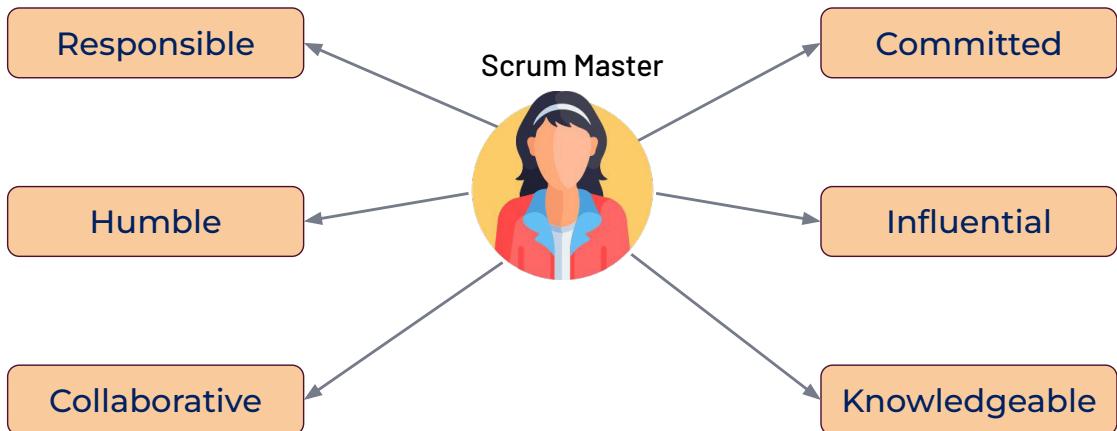

- Clearly expressing Product Backlog items
- Ordering the items in the Product Backlog to best achieve goals and missions
- Optimizing the value of the work the Development Team performs
- Ensuring that the Product Backlog is visible, transparent, and clear to all, and shows what the Scrum Team will work on next
- Ensuring the Development Team understands items in the Product Backlog to the level needed

50

Scrum Master

The Scrum Master is responsible for promoting and supporting Scrum

51

Scrum Master

Scrum Master Service to the Product Owner

- Ensuring that goals, scope, and product domain are understood
- Finding techniques for effective Product Backlog management
- Helping the Scrum Team understand the need for clear and concise Product Backlog items
- Understanding product planning in an empirical environment
- Ensuring the Product Owner knows how to arrange the Product Backlog to maximize value
- Understanding and practicing agility
- Facilitating Scrum events as requested or needed

52

Scrum Master

Scrum Master Service to the Development Team

Coaching the Development Team in self-organization and cross-functionality

Helping the Development Team to create high-value products

Removing impediments to the Development Team's progress

Facilitating Scrum events as requested or needed

Coaching the Development Team in organizational environments in which Scrum is not yet fully adopted and understood

53

Which one looks at the project from the customer's perspective?

Students choose an option

What is the role of the Scrum Master?

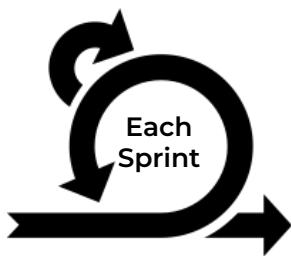

Students choose an option

Pear Deck Interactive Slide
Do not remove this bar

Development Team

The Development Team consists of professionals who do the work of delivering a potentially releasable Increment of “Done” product at the end of each Sprint.

Development Team

Product Increment

► Development Team

They are self-organizing.

Development Teams are cross-functional.

Scrum recognizes no titles for Development Team members.

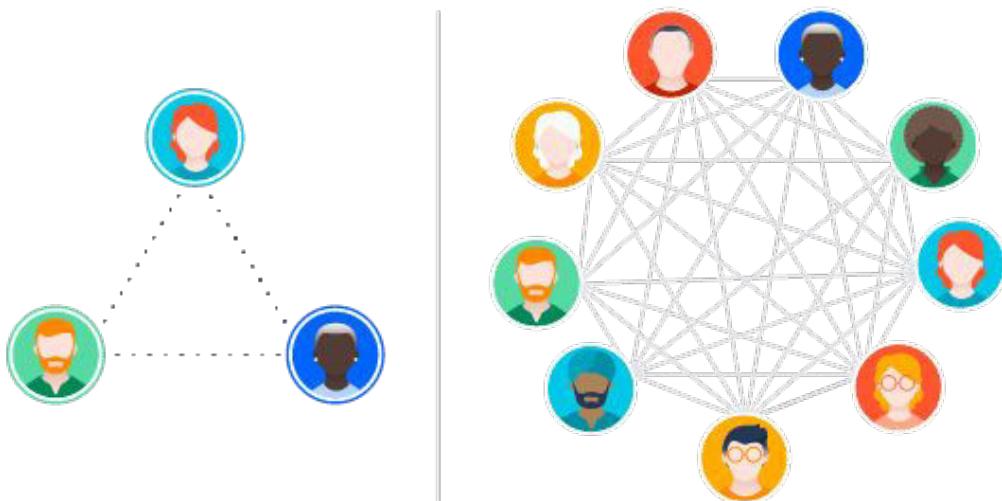

Scrum recognizes no sub-teams in the Development Team.

Accountability belongs to the Development Team as a whole

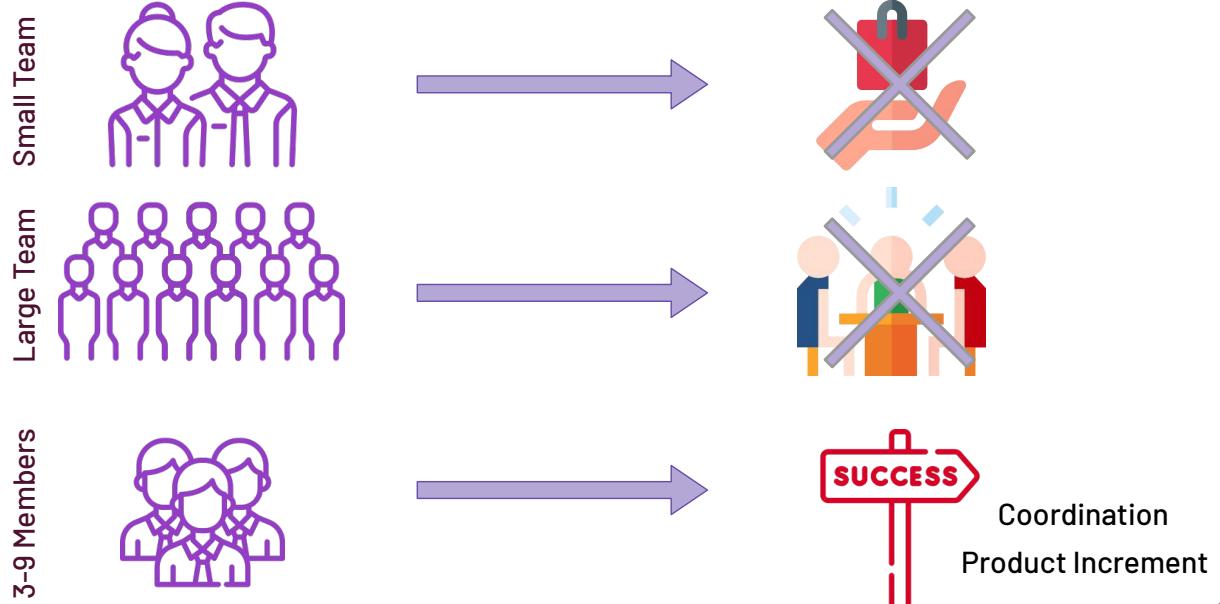

57

► Team Size vs. Coordination

58

► Development Team Size

What do we mean by a cross-functional Development Team?
